## **This Eco-Friendly Food Storage From SuperBee Consists of Reusable Wax Wraps**

This eco-friendly food storage wrap is made from beeswax and can be used to wrap just about anything as an alternative to disposable plastic wrap. Based in Chiang Mai, Thailand, SuperBee sells sustainable food packaging that is made from natural and locally sourced raw materials.

Their SuperBee Wax Wraps are available in a variety of sizes and the reusable beeswax wraps can be washed and reused repeatedly to reduce plastic in the kitchen (and other places around the house). The eco-friendly food storage can be used to cover leftovers, unused avocado halves, giant cheese wheels and more. The wraps are handmade using a fabric that's 100% cotton, organic coconut oil, OTOP-certified beeswax and tree resin.
